Genes gained in ANGR1 MF TreeMap

galactose binding	oligosaccharide binding arbohydrate binding	carbohydrate binding	glutathione transferase activity gap junction hemi-channel activity		n hemi-channel activity
galactoside binding	peptidoglycan binding	integrin binding	cysteine-type endopeptidase inhibitor activity	lysophospholipase activity	glutathione peroxidase activity
	lipid binding	protein–containing complex binding	cysteine-type endopeptidase activity involved in apoptotic process	peroxidase activity	oxidoreductase activity, acting on peroxide as acceptor
