Genes gained in PPUN2 MF TreeMap

DEAD/H-box RNA helicase binding	galactoside binding	protein transmembrane transporter activity	metalloendopeptidase activity		monooxygenase activity
	cargo receptor activity		monooxygenase activity		
GTPase activator activity	signal sequence binding	GPI anchor binding	CoA-ligase activity	oxidoreductase activity, acting on paired donors, with incorporation or reduction of molecular oxygen, another compound as one donor, and incorporation of one atom of oxygen	cysteine-type endopeptidase activity
		cargo receptor activity	acid-thiol ligase activity		
				oxidoreductase activity, acting on the CH–NH group of donors, oxygen as acceptor
