## Genes gained in Ellobiida CC TreeMap

mitochondrion		sarcoplasmic reticulum membrar	ne	viral tegument	host cell endoplasmic reticulum membrane		host cell membrane	
		fungal–type vacuol nembrane	e a	crosomal lumen	host cell cytopla			
viral envelope	virion membrane	chloroplast	intraciliary transport particle A	icosahedral viral capsid	host cell cytoplasm	nost call andoniasmic raticillim		host cell nuclear matrix
		sperm principal piece	nuclear membrane	spore wall	host cell nucleus	host cell junction	host cell nuclear par	host cell t plasmodesma
