Genes gained in PELO1_Crass MF TreeMap

			histone methyltransferase binding dynein complex binding	complement binding	calmodulin binding	polysaccharide binding	protein kinase regulator activity
neuropeptide receptor binding	neuropeptide	e hormone activity		protein binding protein binding	WW domain binding	calcium-dependent protein binding	kinase activator activity
G protein–couple	ed receptor binding			modification-dependent			protein kinase activator activity
			protein binding	carbohydrate binding			
hormone activity	retinoic acid receptor binding	retinoic acid G protein–coupled receptor binding	nitric–oxide synthase activity	ion channel inhibitor activity transcription regulator activity	transcription corepressor activity	translation repressor activity	protein serine/threonine kinase activator activity
							kinase regulator
	receptor ligand activity		channel inhibitor activity	transcription regulator activity	transcription coregulator activity		activity
