## Genes gained in Acteonemertidae CC TreeMap

virion membrane	chromatin	polytene chromosome		nuclear speck		host cell nucleus		host cell cytoplasm
						host	host cell nuclear part	
viral envelope	nucleus phragmoplast	autosome	Mre11 complex		tRNA-intron endonuclease complex		host cell nuclear matrix	
	RNA polymerase transcription factor SL1 complex	cell cortex of cell tip		nragmoplast	pronucleus	host cell Golgi apparatus	host cell nuclear part	
sperm principal piece								
	acrosomal vesicle	centriole		voltage-gated potassium channel complex		host cell memthost cell junction host cell junction		ion host cell junction
