Genes gained in Crassiclitellata CC TreeMap

prospore membrane	viral envelope	cell cortex of cell tip		centriole	pericentric heterochromatin		autosome		core mediator complex
					cytosk <mark>cytosk</mark>	axonei eleton	me	spindle	mediator complex
virion membrane		medial cortex		polytene chromosome chromocenter					
	virion membrane ne leading edge					mitotic		microtubule	
					microtubule cytoskeleton	spindle	mito	tic spindle midzone	SOSS complex
	voltage-gated potassium	phagophore assembly site membrane	intercellular bridge	host cell Golgi app	oaratus	host cell membrane		host cell plasma	PRC1 complex
viral tegument	channel complex					cell cytoplasm		membrane	cilium
	intraciliary transport particle A								
		synaptic cleft		host cell nucleus		host cell Golgi membrane		host cell cytoplasm	ciliary plasm
