## Genes gained in Tardigrada CC TreeMap

virion membrane	acrosomal lumen	fusome	fusome host cell plasma membrane		chromosome, centromeric region	chromosome, telomeric region , centromeric region	centriole	
viral envelope  helical viral capsid	extracelluextracellular regi	viral nucleocapsid ion	host cell Golgi membrane		spectrosome	cytoskeleton	condensed chromosome, centromeric region	
		SCF ubiquitin ligase complex	catenin complex egg choric		GABA-ergic synapse	termin	terminal bouton	
			cateriiri complex	egg chorion	den	dritic spine		
		apoplast	external side of plasma membrane		hippocampal mossy fiber to CA3 synapse	dendritic spine	neuron spine
