Genes gained in Stylomatophora MF TreeMap

calcium-dependent protein binding		beta-catenin binding		histone methyltransferase binding		structural molecule activity	thyrotropin–releasing hormone activity	
сус		SH2 domain binding	receptor tyrosine kinase binding		protein tyrosine kinase binding	molecular function regulator	nction regulator signaling receptor activator activity	enzyme inhibitor activity
dynein complex binding	cyclin binding	neuropeptide receptor binding		chlorophyll Iding	chlorophyll binding	receptor ligand activity	signaling receptor regulator activity	
		mRNA binding	protein kinase C binding		RNA binding	signaling adaptc signaling adaptor activity complex adaptor act		ling receptor adaptor activity
