Genes lost in HRPE1 BP TreeMap

RNA-dependent DNA biosynthetic process RNA-dependent DNA bile acid conjugation Cellular response to amyloid-beta Cellular response to amyloid-beta Cellular response to amyloid-beta Cellular response to amyloid-beta Cellular response to acid Cellular response to morphine response to morphi	of nuclease activity vivis or negative regulation of nuclease activity vivis ac
nucleic acid phosphodiester bond hydrolysis taurine leukotriene le	netic negative negative regulation of regula
metabolic metabo	NF-kappaB transcription transc
process process acyl-CoA thioester telomeric 3' stimulus cell ethanol feature regulation regulation	of hereconformatin superscent by regulation regulation regulation pathway regulation reg
decay/non-unclessed triphospharia metabolic metabolic metabolic overhang formation metabolic met	small RNA heterochromatin Ni-kappas catcholic phosphatase supposed catcholic phosphatase supp
peptidoglycan peptidoglycan positive po	metanephros stem cell stem
metabolic ubiquitination with the state of t	development population target transfer regulation by regulation healing production
ubiquitination ubiquitination self self vibitophysis protein self-vibitophysis protein self-vibi	eneration to best call release from or viral involved in involved in
galactosylceramide process, process substitute process and process catalogue process	sperm individualization connective tissue developmen to the cell inflammatory inflammatory
bile acid catabolic process endonucleolytic plasminogen activation activation bile acid catabolic process endonucleolytic plasminogen activation bile acid catabolic process activation bile acid catabolic process activation activation bile acid catabolic process activation activation bile acid catabolic process activation bile acid catabolic process activation activation bile acid catabolic process activation activation bile acid catabolic process activation activation activation bile acid catabolic process activation activ	growth viral biological process involved
break processing breakforces and double-strand peptidoglycan branched chair amino acid double-strand p	animal organ regeneration gland cell assembly host cell interaction host process
process integration synthesis-dependent strand annealing synthesis-dependent strand annealing processing process process process process pathway pathway	nembrane angiogenesis development developm
positive positive regulation positive regulati	regulation of re
regulation of T cell muscle phosphate chloride ion to macrophage oligomerization oligomerization oligomerization oligomerization oligomerization oligomerization oligomerization oligomerization oligomerization of T cell muscle phosphate chloride ion to macrophage oligomerization oligomerization oligomerization of T cell muscle phosphate chloride ion to macrophage oligomerization oligomerization oligomerization oligomerization of T cell muscle phosphate chloride ion to macrophage oligomerization oligomeriza	blood vessel morphogenesis system other organism modulation modulation response to complement response to
Of Inatify apoptotic contraction homoestasis factor stimulus signaling pathway	pment development blactorust blac
response immunoglobulin immunoglobulin protein signaling pathway signaling pathway	development histolysis into host cell response peptide production release from release from peptide production response production
detection of concerv immune to UV perception of absorption to vacually perception of the concerv immune to UV perception of absorption to vacually perception of the concerv immune to UV perception of absorption to vacually perception of the concerv immune to UV perception of absorption to vacually perception of the concerv immune to UV perception of absorption to vacually perception of the concerv immune to UV perception of absorption to vacually perception of the concerv immune to UV perception of the concerv immune to	positive pos
mechanical percention mitotic G2 regulation regulation of regulation of regulation of regulation of regulation regulation regulation regulation regulation of regulation of regulation regu	gulation of regulation regulation of regulation regu
stimulus involved DNA damage Single corticotropin corticotropin of oxidative of B cell fibroblast differentiation differentiation continuous properties of the co	okine (C–X–C interleukin–1 production involved in inflammatory positive regulation of feeding regulation regul
perception of stress—induced proliferation positive regulation plants and provided proliferation provided provided provided proliferation provided pr	response negative regulation of negative regulation of pharyngea
intestinal transmembrane perception diameter p	interloukin 23 factor regulation of
epithelial plasma membrane filtration positive proliferation provide proliferation provide proliferation provide proliferation provide proliferation provide proliferation provide provide proliferation provide prov	positive regulation of production production production production
acid or a fluid mitochondrial acid macronhage muscle cell negative negative endocring cytaking macronhage muscle cell or negative cell cycle ibrinolysis in mocyte endocring cytaking macronhage muscle cell or negative ne	nacinterleukin-6 production ne production ne production ne production ne production ne production ne production negative regulation of interleukin-1 production behavior
regulation of transport into transpo	positive positive cytokine cotony-stimulating interfeukin-1 beta beta beta positive production beta production beta production of feeding pumping regulation regulat
temperature DNA binding D	positive positive positive positive regulation of production production behavior behavior
stimulus involved regulation of regulation o	gulation of regulation of regulation of regulation of interferon-beta interferon-alpha cold—induced regulation of
in sensory homeostasis ussue homeostasis ussue homeostasis ussue homeostasis perception of All-perception of All-percept	eron—gamma roduction production of interleukin—6 production of production production of interleukin—6 production production of interleukin—6 production production of interleukin—6 production production of interleukin—6 production productio
